The image shows a contour plot with labeled contours indicating different temperature values in degrees Celsius. The contours are labeled with values such as 23, 24, 25, 26, and 26.5. The plot is oriented with latitude on the x-axis and depth on the y-axis, ranging from 0 to 1000 meters. The color gradient from lighter to darker green represents increasing temperature values, with darker shades indicating lower temperatures and lighter shades indicating higher temperatures.
